Book Illustration

Year 5 Lodge Farm Primary Home Learning Grid

Make a collection of three types of objects. For example, pebbles, sticks and shells.
Give each type of object a secret value. For example, pebble = 3, stick = 4 and shell = 16.
Create a pair of algebraic equations using the objects in which 1 object is different like below.

$$\begin{array}{l} \text{stick} + \text{stick} + \text{pebble} + \text{shell} = 27 \\ \text{stick} + \text{pebble} + \text{shell} = 23 \end{array}$$

Challenge someone to discover what the secret values of the items are.
Ask them to provide different secret values and the sums for you to solve.

Make up some more secret values and place them in a grid with the sums on each row.
Make sure it can be solved!

Challenge someone to solve the problem.

Ask them to create one for you.

			= <input type="text"/>
			= <input type="text"/>
			= 31
= <input type="text"/>	= <input type="text"/>	= 45

Use a pack of playing cards and a dice. In each game, the highest score wins.

Game One

- Discard all of the 'picture' cards i.e. Jacks, Queens and Kings.
- Throw a dice and take a card from the top of the pack.
- Multiply the two amounts together to find the product.
- The player with the highest total score after three rounds wins.

Game Two

- Discard all of the 'picture' cards i.e. Jacks, Queens and Kings.
- Take four cards from the top of the pack, make two, two-digit numbers (e.g. 26 and 52) and multiply them together.
- The player with the highest total score after three rounds wins.

Game Three

- Jacks are worth 10, Queens are worth 100 and Kings are worth 1,000.
- Each player takes two cards from the top of the pack and multiply the amounts.
- The highest scorer in each round gets a point and the first to five points wins.
