

Magic Squares

In maths we have been learning how to convert between fractions, decimals and percentages. **For example:** $0.25 = 25/100$ (which can also be simplified to $\frac{1}{4}$) = 25%

1. Please complete the square below, remember it has to equal to 100% on each horizontal line. **Challenge: If you want to make it equal 100% vertically as well, you can!**

0.25	0.05	70%

2. Complete your own two squares. **Challenge: Do not use the same number twice!**
